CARGO

About Qatar Airways Cargo

Qatar Airways Cargo serves 60 dedicated freighter destinations around the world, via our hub in Doha. We deliver cargo to over 150 key destinations globally on 200 aircraft.

Cargo handled includes automobiles, pharmaceuticals, perishables, valuables, live animals, dangerous goods, oversized cargo and general cargo that require air freight carriage.

The freighter fleet currently includes eight Airbus A330F and twelve Boeing 777 freighters.

Qatar Airways' cargo network provides a global reach for customers in Africa, Europe, North America, South America, the Middle East, South Asia, South East Asia, North East Asia and Australia.

Keeping it fresh

Whether you ship salmon from Norway, meat from Australia, flowers from Uganda, berries from Argentina, asparagus from Thailand, mangoes from Pakistan or beans from Kenya, we will keep it fresh for you.

Moving these items is a vast operation, with a host of innovations designed to do just one thing - keep perishable goods at the perfect temperature from pick-up to delivery.

Our solutions are proven to work in the toughest conditions, protecting your temperature-sensitive cargo every step of the way.

From the hub

Our hub in Doha operates with the highest industry standards, compliant to IATA Chapter 17. That's why exporters, importers and retailers around the world rely on our QR Fresh solution to move their perishable products.

Qatar's royal "Moza" rose is grown exclusively by Roza Hassad at its farm in the desert and is carefully exported by QR Fresh internationally.

Temperature sensitive goods

QR Fresh is designed to keep all kinds of temperature sensitive goods at their optimal temperatures from arrival at the origin airport through to their final destination. There are designated airside temperature-controlled areas that help keep your shipment at the correct temperature prior to aircraft departure.

Delivering it fresh

A dedicated airside team actively manages your shipment, ensuring the movement to and from the aircraft is seamless. Guaranteeing freshness means controlling temperature, whether it is delivering mountains of fresh salmon or boxes of delicate strawberries. Our innovative QR Fresh solution preserves the high quality of your goods and extends their shelf life.

Fast airline transfer

The Quick Ramp Transfer (QRT) offers the fastest airline transfer at Doha. The use of temperature-controlled vehicles eliminates temperature exposure risk to guarantee a complete fresh transfer.

Rest assured that we meet the extra attention and special handling, acceptance and delivery processes required by IATA and other governing bodies. Throughout our network worldwide, QR Fresh ensures your consignment arrives in perfect condition and on time.

Climate Control

Our Climate Control team proactively monitors your shipment from beginning to end, anticipating any potential issues and ensuring a seamless transfer.

Our main features:

- The Quick Ramp Transfer (QRT) offers transportation between ramp and warehouse with temperature-controlled vehicles to provide protection from extreme ambient conditions during transportation
- Temperature-controlled handling and storage at Doha Cargo Terminal in the appropriate temperature zone

State-of-the-art cargo terminal at Hamad International Airport

Our brand new cargo terminal at Hamad International Airport offers state-of-the-art technology and world-class service to customers across the globe. Built to handle 1.4 million tonnes of cargo annually our cargo terminal is one of the largest in the world. It provides an air cargo handling system capable of accommodating 1,005 Unit Load Devices (ULD) and 5,000 consignment cages.

Our high-tech Cargo Warehouse Information System (CWIS) can pinpoint the location of every cargo in the terminal with precise accuracy. This means that each cargo can be tracked and processed quickly and efficiently, whether it's stored in the ULD System, consignment cages or in any of the various special cargo handling areas. The entire facility is climate-controlled, and we have also made provisions for the recharging of the latest technology electrical active containers in a separate handling area.

High, round-the-clock security measures and individual security cards to official cargo staff ensures restricted access and offers customers peace of mind.

HIA Cargo terminal features

- Cargo capacity: 1.4 million tonnes per year
- Aircraft parking facilities: Up to 11 code F Freighters
- ULD capacity: 1005 main deck units
- Cargo complex area: 292,000 sq m
- Cargo terminal building: 55,000 sq m
- Airside Climate Control Centre 2470 sqm
- 220 temperature-controlled positions for units requiring refrigeration
- Cargo agent building: 5,000 sq m
